BASIC-ABSTRACT:

Binder for pharmaceutical preparation comprises aq. gel comprising xanthan gum and locust bean (carob bean) gum or aq. gel of carrageenan. Combination of xanthan gum and locust bean gum or carrageenan may be converted into aq. gel by blending 5-10 pts. of mixt. of xanthan gum and locust bean gum (1-10:1-10 pts.) of carrageenan and 100 pts. of water and/or glycerine and heating resultant mixt.

Amt. of binder for pharmaceutical preparation is approx. 1 wt.% to pharmaceutical drug. In an example, xanthan gum and locust bean gum were added

to glycerine and resultant mixt. was heated to 90-110 degrees C to dissolve;
further boric acid was added; dried kaoline was mixed into the mixt.,
soln. of
thymol dissolved in methyl salicylate and peppermint oil at 50-60
degrees C was
added and blended to prepare poultice.
